

The fold & slide fitting for large openings and full flexibility.

The PORTAL FS^{PLUS} enables up to seven fold & slide elements, weighing up to 80 kg per sash, to be effortlessly folded together, thereby creating opening widths of up to 6.3 metres. The hardware covers can be painted in any colour to suit any design.

Fold & slide elements that open outwards also open up new areas of business. The use of new materials and coating technologies make the new hardware ideal for long-term use outdoors as well.

PORTAL FS^{PLUS}:

- Top or bottom running
- Inward or outward opening
- Smooth sash motion thanks to ball-bearing rollers made of special PVC
- Plastic bearing makes the sash hinges maintenance-free
- Also available in a highly corrosion-resistant stainless steel look
- Barrier-free threshold versions in accordance with DIN 18040 are available
- For profiles with 16-mm fitting groove in all frame materials

PORTAL FS^{PLUS} ALU:

- Top or bottom running with the same profile set
- For profiles with ALU eurogroove
- Stable running track with convenient threshold height
- Smooth running
- Efficient installation thanks to few, ready-to-assemble components
